### **About Antipa Minerals:**

Antipa Minerals Ltd is an Australian public company which was formed with the objective of identifying under-explored mineral projects in mineral provinces which have the potential to host world class mineral deposits, thereby offering high leverage exploration potential. The Company owns a 1,714km<sup>2</sup> package of prospective tenements in the Proterozoic Paterson Province of Western Australia known as the Citadel Project. The Citadel Project is located approximately 100km north of Newcrest's Telfer gold-copper mine and includes the drill defined gold and copper mineralisation known as the Magnum Deposit.

The Company has applied for an additional 1,330km<sup>2</sup> of exploration licences, known as the North Telfer Project, which, on grant, will extend its ground holding in the Paterson Province to within 20km of Telfer and 30km of O'Callaghan's.

ASX: AZY

### **Company Background**

- Listed on ASX 19 April 2011 following successful completion of A\$10 million IPO.
- Citadel Project acquired from Centaurus Metals in April 2011 for shares/options upon completion of IPO.
- North Telfer Project priority application lodged May 2011, pursuant to an agreement with Paladin Energy.
- Maiden Mineral Resource for Magnum deposit announced March 2012.
- Corker high-grade precious and base metal deposit discovered April 2012.
- Calibre gold-copper deposit discovered November 2012.

### **Company Projects**

1,714km<sup>2</sup> package of prospective tenements in the Proterozoic Paterson Province of Western Australia known as the Citadel Project.

Citadel Project is located approximately 100km north of Newcrest's Telfer gold-copper mine and includes the drill defined gold and copper Magnum Deposit.

Applications covering an additional 1,330km<sup>2</sup> of exploration licences, known as the North Telfer Project which is located approximately just 20km north of Newcrest's Telfer gold-copper mine.

**Competent Persons Statement:** The information in this document that relates to Exploration Results is based on information compiled by Mr Roger Mason who is a full-time employee of the Company and is a member of the Australasian Institute of Mining and Metallurgy. Roger Mason has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Roger Mason consents to the inclusion in the document of the matters based on his information in the form and context in which it appears.

**Forward-Looking Statements:** This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Antipa Mineral Ltd's planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are forward-looking statements. Although Antipa Minerals Ltd believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.
