

STRATEGIC POSITION IN A WORLD CLASS MINERAL PROVINCE

CORPORATE PRESENTATION Annual General Meeting – 20 November 2020

IMPORTANT NOTICE / DISCLAIMER

Nature of this document: The purpose of this document is to provide general information about Antipa Minerals Limited (the 'Company'). Unless otherwise stated herein, the information in this document is based on the Company's own information and estimates. In viewing this document you agree to be bound by the following terms and conditions.

Not an offer: This document is for information purposes only and does not constitute or form any part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any securities in the Company in any jurisdiction, including the United States. This document and its contents must not be distributed, transmitted or viewed by any person in any jurisdiction where the distribution, transmission or viewing of this document would be unlawful under the securities or other laws of that or any other jurisdiction. In particular, this document is not for release to US newswire services or distribution in the United States.

This document is not considered a recommendation by the Company or any of its affiliates, directors or officers that any recipient invest in the Company nor does it constitute investment, accounting, financial, legal or tax advice.

Not financial product advice: This document does not take into account the individual investment objectives, financial situation and particular needs of each of the Company's Shareholders. You may wish to seek independent financial and taxation advice before making any decision in respect of this document.

Neither the Company nor any of its related bodies corporate is licensed to provide financial product advice in respect of the Company's securities or any other financial products.

Forward looking statements: Certain statements contained in this presentation, including information as to the future financial or operating performance of the Company and its projects, are forward looking statements. Such forward looking statements: (a) are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies; (b) involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward looking statements; and (c) may include, among other things, statements regarding estimates and assumptions in respect of prices, costs, results and capital expenditure, and are or may be based on assumptions and estimates related to future technical, economic, market, political, social and other conditions.

The Company disclaims any intent or obligation to publicly update any forward looking statements, whether as a result of new information, future events or results or otherwise. The words "believe", "expect", "anticipate", "indicate", "contemplate", "target", "plan", "intends", "continue", "budget", "estimate", "may", "will", "schedule" and similar expressions identify forward looking statements. All forward looking statements contained in this Presentation are qualified by the foregoing cautionary statements. Recipients are cautioned that forward looking statements are not guarantees of future performance and accordingly recipients are cautioned not to put undue reliance on forward looking statements due to the inherent uncertainty therein.

Disclaimer: No representation or warranty, express or implied, is made by the Company that the material contained in this document will be achieved or prove to be correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisers and agents expressly disclaims any responsibility for the accuracy, fairness, sufficiency or completeness of the material contained in this document, or any opinions or beliefs contained in this document, and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this document or any error or omission therefrom. The Company is under no obligation to update or keep current the information contained in this document or to correct any inaccuracy or omission which may become apparent, or to furnish any person with any further information, unless required to do so by law. Any opinions expressed in the document are subject to change without notice. Recipients of this document should make their own, independent investigation and assessment of the Company its business, assets and liabilities, prospects and profits and losses, as well as the matters covered in this document. Independent expert advice should be sought before any decision based on an assessment of the Company is made.

Unverified information: This document may contain information (including information derived from publicly available sources) that has not been independently verified by the Company.

Cautionary note regarding reserves and resources: You should be aware that as an Australian company with securities listed on the ASX, the Company is required to report reserves and resources in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code, 2012 Edition). You should note that while the Company's reserve and resource estimates comply with the JORC Code, they may not comply with the relevant guidelines in other countries and, in particular, do not comply with Industry Guide 7, which governs disclosures of mineral reserves in registration statements filed with the US Securities and Exchange Commission. Information contained in this presentation describing the Company's mineral deposits may not be comparable to similar information made public by companies subject to the reporting and disclosure requirements of US securities laws. In particular, Industry Guide 7 does not recognise classifications other than proven and probable reserves and, as a result, the SEC generally does not permit mining companies to disclose their mineral resources in SEC filings. You should not assume that quantities reported as "resources" will be converted to reserves under the JORC Code or any other reporting regime or that the Company will be able to legally and economically extract them.

Competent Persons Statement: Exploration Results: Please refer to the detailed statement at the end of this document.

Competent Persons Statement: Mineral Resource Estimations for the Minyari-WACA Deposits, Calibre Deposit and Magnum Deposit: Please refer to detailed statement at end of this document.

Australian Dollars: All figures in Australian Dollars unless stated otherwise.

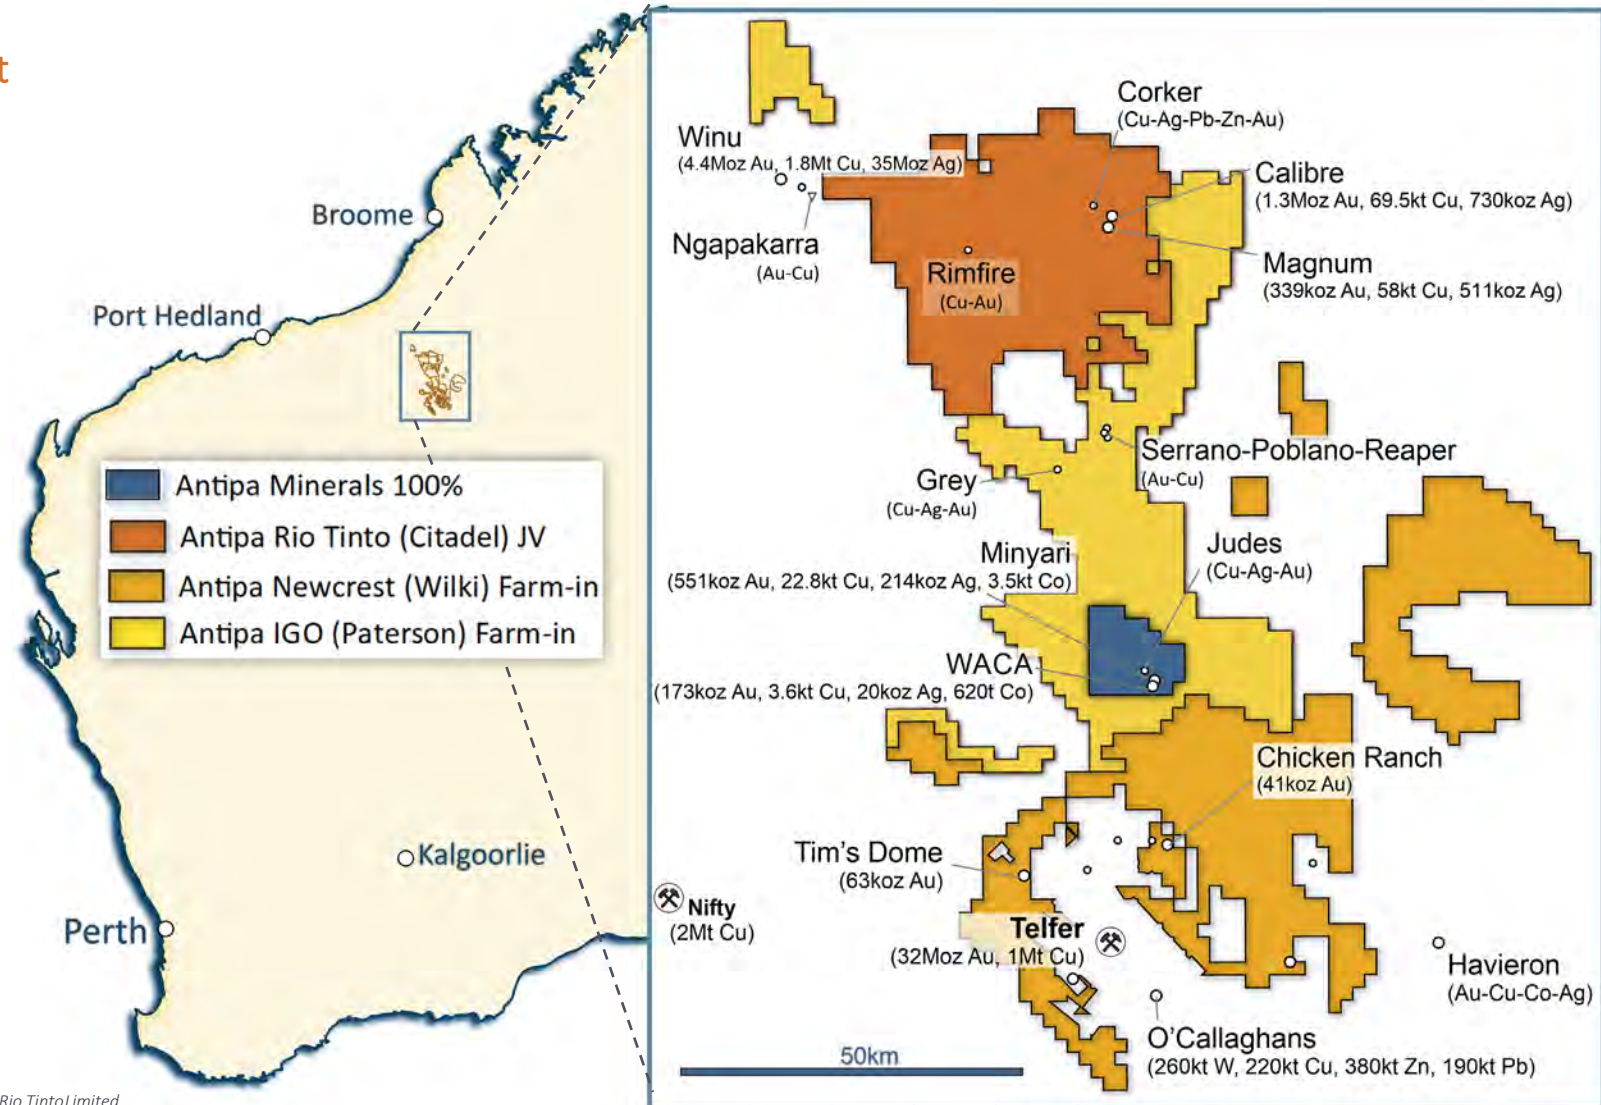

Release Authorised by: Stephen Power, Executive Chairman

COMPELLING INVESTMENT OPPORTUNITY

Advancing world class exploration and development projects

Significant Exploration and Resource Development Potential in World Class Paterson Province

- 5,200km² of under-explored gold and copper exploration ground in a province hosting producing mines and recent world class discoveries
- Farm-in agreements/joint ventures with:
 - Rio Tinto
 - Newcrest
 - IGO
- Combined existing JORC resource in excess of 2.3Moz gold on joint venture and 100% ground
- Cumulative potential free-carried exploration spend of A\$150 million
- Minimum free-carried exploration spend of A\$20 million over next 2 years

1. All references to 'Rio Tinto' in this document are to Rio Tinto Exploration Pty Ltd, a wholly owned subsidiary of Rio Tinto Limited
2. All references to 'Newcrest' in this document are to Newcrest Operations Ltd, a wholly owned subsidiary of Newcrest Mining Limited
3. All references to 'IGO' in this document are to IGO Newsearch Pty Ltd, a wholly owned subsidiary of IGO Limited
4. NB: 2.3Moz gold Mineral Resource includes Rio Tinto's 51% of the Calibre and Magnum Mineral Resources

HIGH-QUALITY PARTNERS TO FAST-TRACK DISCOVERIES AND DEVELOPMENT

Farm-in/Joint Venture and development projects

Citadel Project - A\$60m Rio Tinto Farm-in Joint Venture for up to 75% interest agreed 2015

- 1,330km² Antipa / Rio Tinto JV with existing combined Mineral Resource: 1.6Moz gold at 0.8 g/t and 127kt copper at 0.20% just 45km from Rio Tinto's Winu copper-gold-silver project, which is targeting first production in 2023, subject to securing all necessary approvals¹
- A\$12.6m budget approved for calendar year 2020²

Wilki Project - A\$60m Newcrest Farm-in for up to 75% interest agreed 2020

- 2,212km² Antipa / Newcrest Farm-in project comes within 3km of Telfer surrounding Telfer on three sides
- Newcrest acquires 9.9% interest in Antipa via total A\$4.3m investment

Paterson Project - A\$30m IGO Farm-in for up to 70% interest agreed 2020

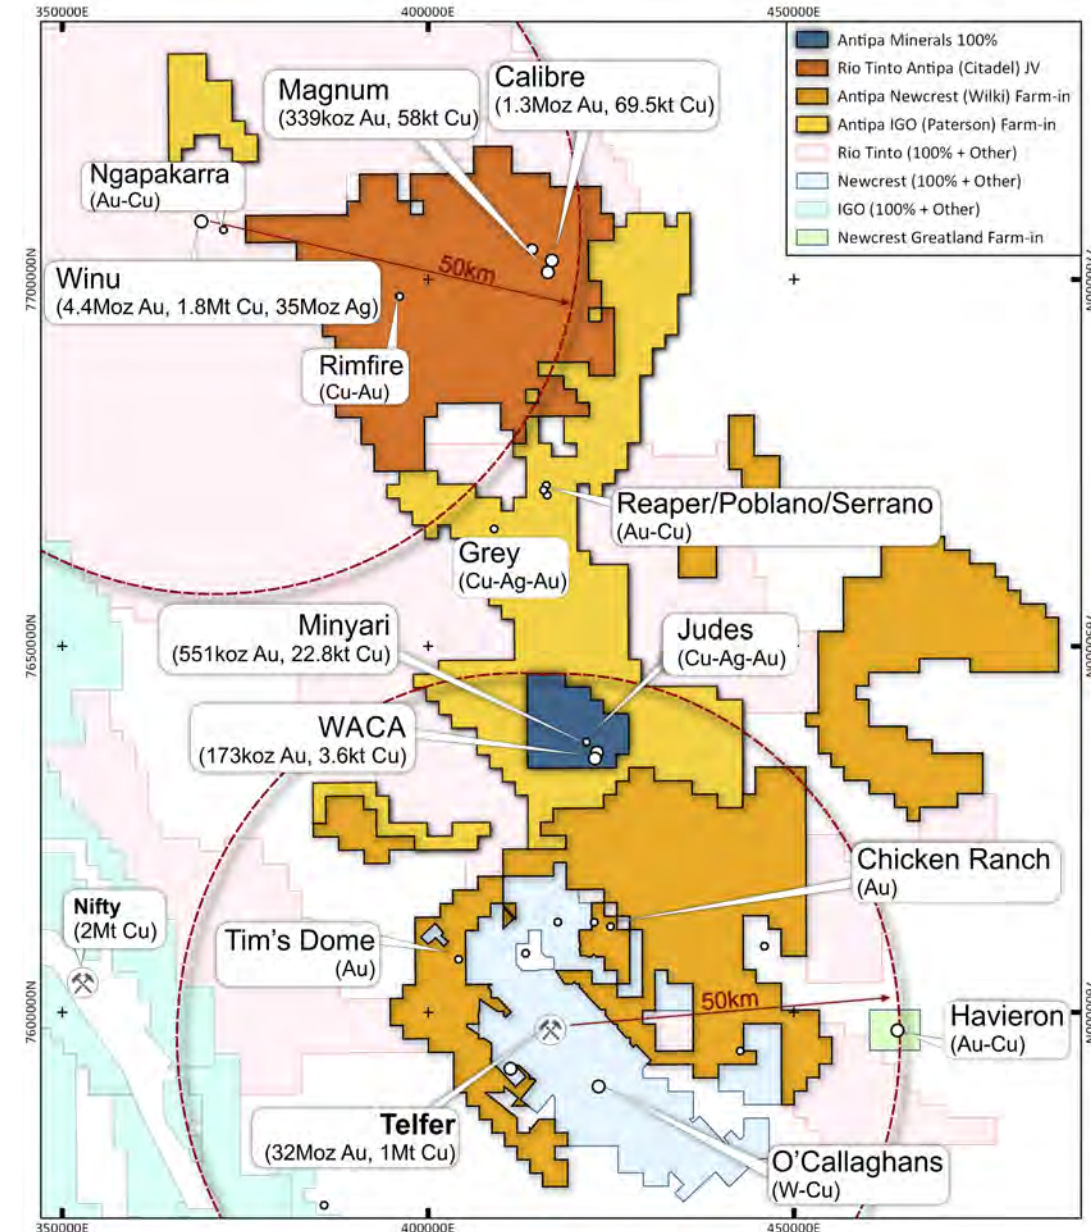

- 1,563km² Antipa / IGO Farm-in project comes within 23km of Telfer and 8km of Rio Tinto's Winu deposit
- A\$30m plus free-carry to completion of a Feasibility Study
- IGO acquired 4.9% interest in Antipa via A\$3.27m share placement

Resource Development - 100%-owned ground

- Mineral Resource of 723koz gold at 2.0 g/t and 26kt copper at 0.24%
- Proximal location to Telfer Mine and mineral processing facility (within 40km)
- Significant exploration upside to current high-grade resource

1. On 28 July 2020, Rio Tinto disclosed a maiden Inferred Mineral Resource for Winu (which at a 0.2% copper equivalent cut-off, is 503Mt at 0.45% copper equivalent (CuEq) and includes a higher grade component of 188Mt at 0.68% CuEq at a cut-off grade of 0.45% CuEq) and stated that it 'was targeting first production from Winu in 2023, subject to securing all necessary approvals'. On 16 October 2020, Rio Tinto discloses that 'Engagement with Traditional Owners had resumed following easing of COVID-19 travel restrictions in WA' and that this 'engagement is likely to take longer than originally forecast, and hence may have an impact on first targeted production of 2023'. For further information on Winu, please refer to Rio Tinto's website (www.riotinto.com) and Australian Securities Exchange (ASX: RIO) news releases (www.asx.com.au) (www.asx.com.au)

2. Exploration programmes are subject to any changes which may be made consequent upon results, field conditions and ongoing review

RIO TINTO CITADEL JOINT VENTURE

Overview

- 1,330km² Citadel Project
- Existing Calibre-Magnum gold-copper-silver resource situated 45km east of Rio Tinto's Winu copper-gold-silver project which is targeting first production in 2023, subject to securing all necessary approvals¹
- A\$12.6m 2020 exploration programme, fully funded by Rio Tinto, focussed on increasing existing Calibre gold-copper-silver resource²
- Current JV ownership = Antipa 49% : Rio Tinto 51% (Rio earned 51% by sole funding A\$11m)
- Rio may earn a 65% interest in the Citadel Project by spending a total of A\$14m from start of 2020
- Rio may earn up to 75% by sole funding a further A\$35m⁴

Calibre Deposit (Gold, Copper, Silver)

- Inferred Mineral Resource 47.7Mt at 0.85 g/t gold, 0.15% copper and 0.48 g/t silver for 1.3Moz gold, 70kt copper and 730koz silver
- 1.6km long, up to 480m thick, extends 500m down dip - Remains open in several directions

Magnum Deposit (Gold, Copper, Silver)

- Inferred Mineral Resource 16.1Mt at 0.66 g/t gold, 0.36% copper and 0.99 g/t silver for 339koz gold, 58kt copper and 511koz silver - Open in most directions

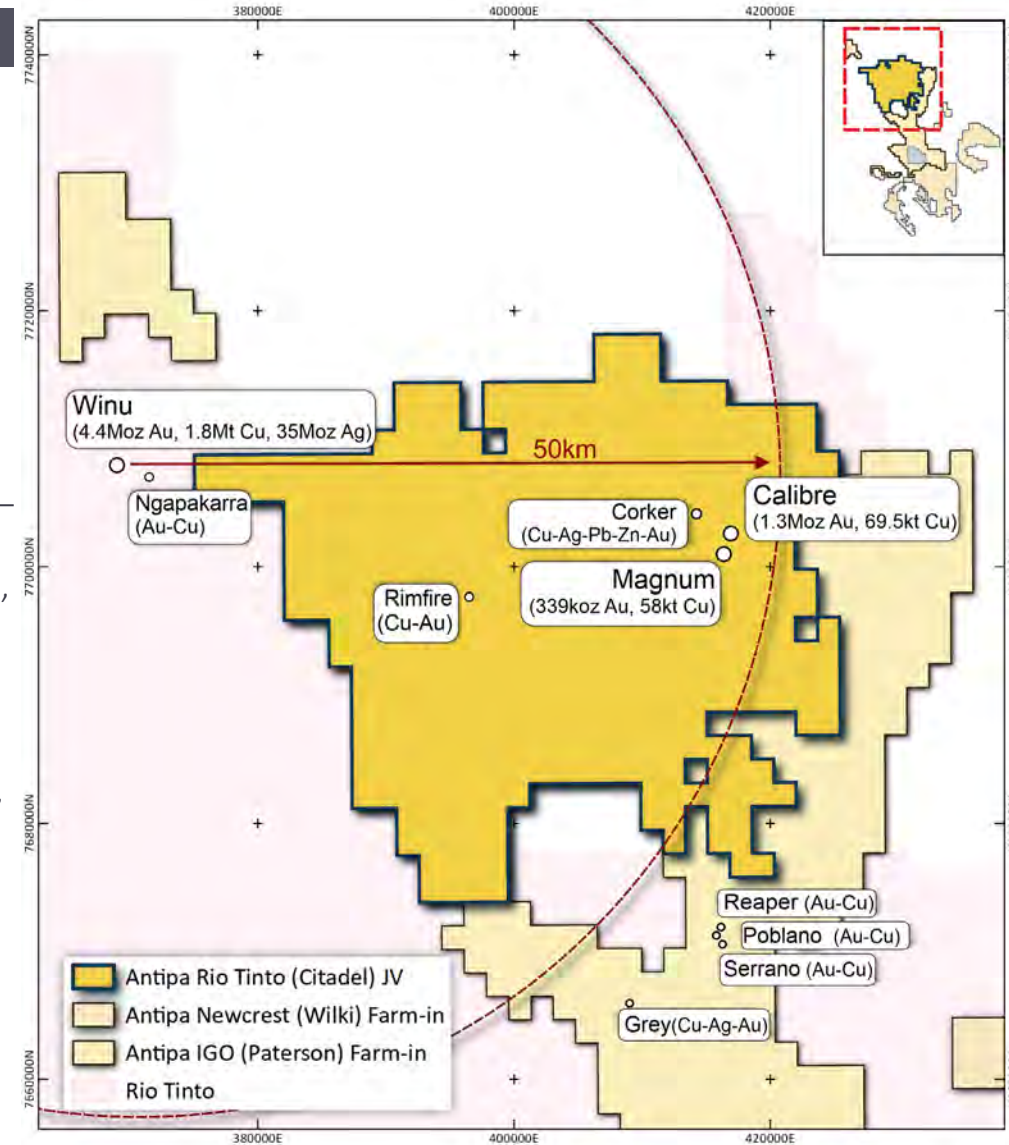

2020 Exploration Programme²

- Further evaluation of the Calibre gold-copper-silver Mineral Resource – Including significant drilling
- Extensive Gradient Array Induced Polarisation (GAIP) surveys along favourable structural corridors
- Drill testing of greenfield copper-gold targets, including at Rimfire approximately 25km from Winu
- Remodelling of the broader Magnum Dome and identification of new greenfield drill targets

1. On 28 July 2020, Rio Tinto disclosed a maiden Inferred Mineral Resource for Winu (which at a 0.2% copper equivalent cut-off, is 503Mt at 0.45% copper equivalent (CuEq) and includes a higher grade component of 188Mt at 0.68% CuEq at a cut-off grade of 0.45% CuEq) and stated that it 'was targeting first production from Winu in 2023, subject to securing all necessary approvals'. On 16 October 2020, Rio Tinto discloses that 'Engagement with Traditional Owners had resumed following easing of COVID-19 travel restrictions in WA' and that this 'engagement is likely to take longer than originally forecast, and hence may have an impact on first targeted production of 2023'. For further information on Winu, please refer to Rio Tinto's website (www.riotinto.com) and Australian Securities Exchange (ASX: RIO) news releases (www.asx.com.au)

2. Exploration programme is subject to any changes which may be made consequent upon results, field conditions and ongoing review

3. Within 8 years of 1 January 2020 noting that Antipa may elect to contribute during this stage and maintain a 35% joint venture interest

CALIBRE DEPOSIT (RIO TINTO JV)

Significant Au-Cu-Ag Resource with growth potential

Calibre Gold, Copper, Silver Deposit

- Discovered by Antipa under 80m of cover
- 1.6km long, up to 480m thick, extends 500m down dip - Remains open in all directions
- Located just 45km east of Rio Tinto's Winu 503 million tonne, 4.4Moz gold, 1.8Mt copper and 35Moz silver project, which is targeting first production in 2023, subject to securing all necessary approvals¹
- Large scale mineral system with material resource and exploration upside

2020 Mineral Resource Extension Drill Programme

- Significant drill programme to evaluate potential material resource increase²
- Emphasis on extending regions of higher-grade gold-copper mineralisation

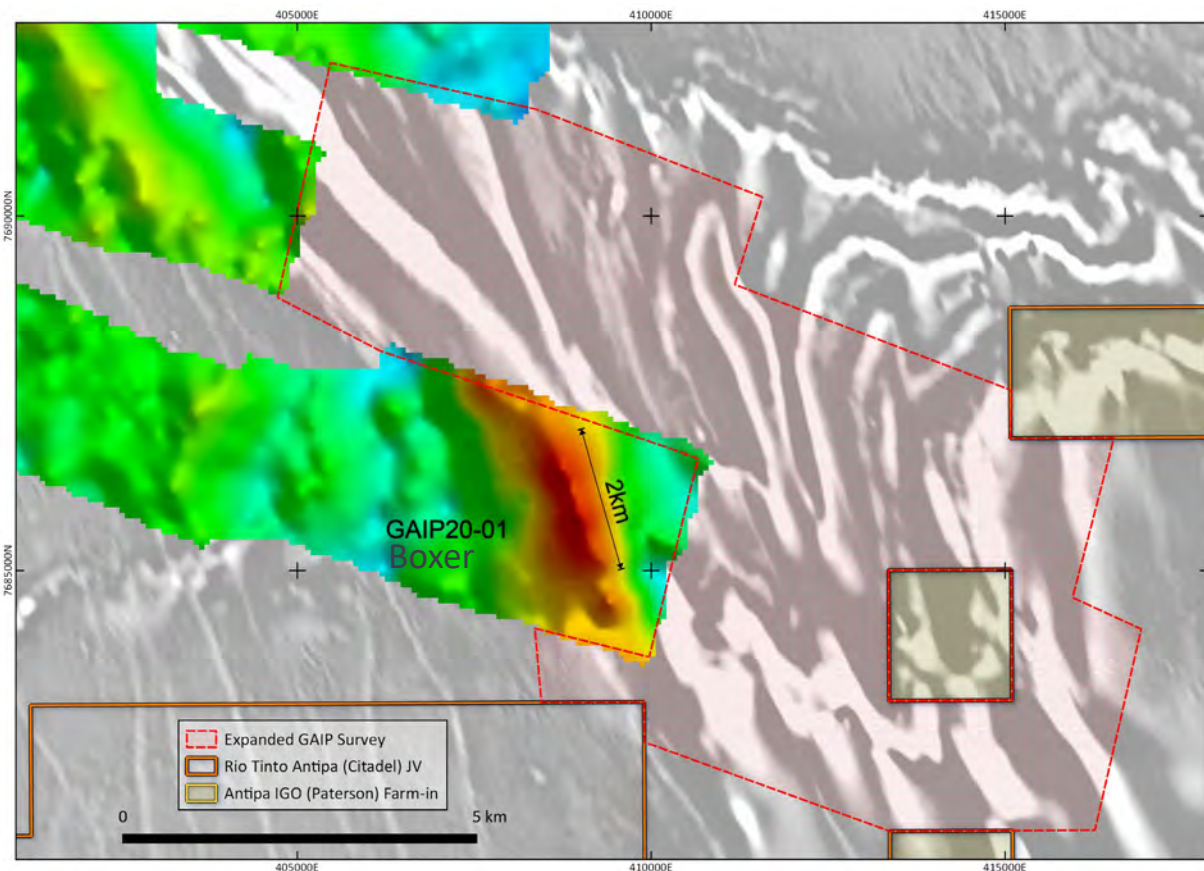

1. On 28 July, Rio Tinto disclosed a maiden Inferred Mineral Resource for Winu (which at a 0.2% copper equivalent cut-off, is 503Mt at 0.45% copper equivalent (CuEq) and includes a higher grade component of 188Mt at 0.68% CuEq at a cut-off grade of 0.45% CuEq) and stated that it 'was targeting first production from Winu in 2023, subject to securing all necessary approvals'. On 16 October 2020, Rio Tinto discloses that 'Engagement with Traditional Owners had resumed following easing of COVID-19 travel restrictions in WA' and that this 'engagement is likely to take longer than originally forecast, and hence may have an impact on first targeted production of 2023'. For further information on Winu, please refer to Rio Tinto's website (www.riotinto.com) and Australian Securities Exchange (ASX: RIO) news releases (www.asx.com.au) (www.asx.com.au)

2. Exploration programmes are subject to any changes which may be made consequent upon results, field conditions and ongoing review

COMPELLING GREENFIELD TARGET (RIO TINTO JV)

Large gold-copper 2020 geophysical target

GAIP Survey Defines +1.5 kilometre long by 900m wide Gold-Copper Target

- High priority “GAIP20-01” IP target, now known as the “Boxer” target situated:
 - 40km from Rio Tinto’s 503 million tonne Winu copper-gold-silver project¹
 - 15km from the Rio-Antipa JV’s 1.6Moz gold and 127kt copper Calibre and Magnum Mineral Resources
 - 14km from the Antipa-IGO farm-in/JV’s Reaper-Poblano-Serrano gold-copper prospects along the same mineral system bearing structure
- Target has similar IP chargeability and structural setting characteristics to both the Calibre and Magnum gold-copper-silver deposits
- 2020 GAIP survey expanded to cover potential strike extensions to the “Boxer” anomaly and prospective regions nearby
- Drill testing planned for early 2021²

1. On 28 July, 2020 Rio Tinto disclosed a maiden Inferred Mineral Resource for Winu (which at a 0.2% copper equivalent cut-off, is 503Mt at 0.45% copper equivalent (CuEq) and includes a higher grade component of 188Mt at 0.68% CuEq at a cut-off grade of 0.45% CuEq) and stated that it ‘was targeting first production from Winu in 2023, subject to securing all necessary approvals’. On 16 October 2020, Rio Tinto discloses that ‘Engagement with Traditional Owners had resumed following easing of COVID-19 travel restrictions in WA’ and that this ‘engagement is likely to take longer than originally forecast, and hence may have an impact on first targeted production of 2023’. For further information on Winu, please refer to Rio Tinto’s website (www.riotinto.com) and Australian Securities Exchange (ASX: RIO) news releases (www.asx.com.au)
2. Exploration programmes are subject to any changes which may be made consequent upon results, field conditions and ongoing review

ESTABLISHED RESOURCE BASE – 100% OWNED GROUND

RESOURCE DEVELOPMENT

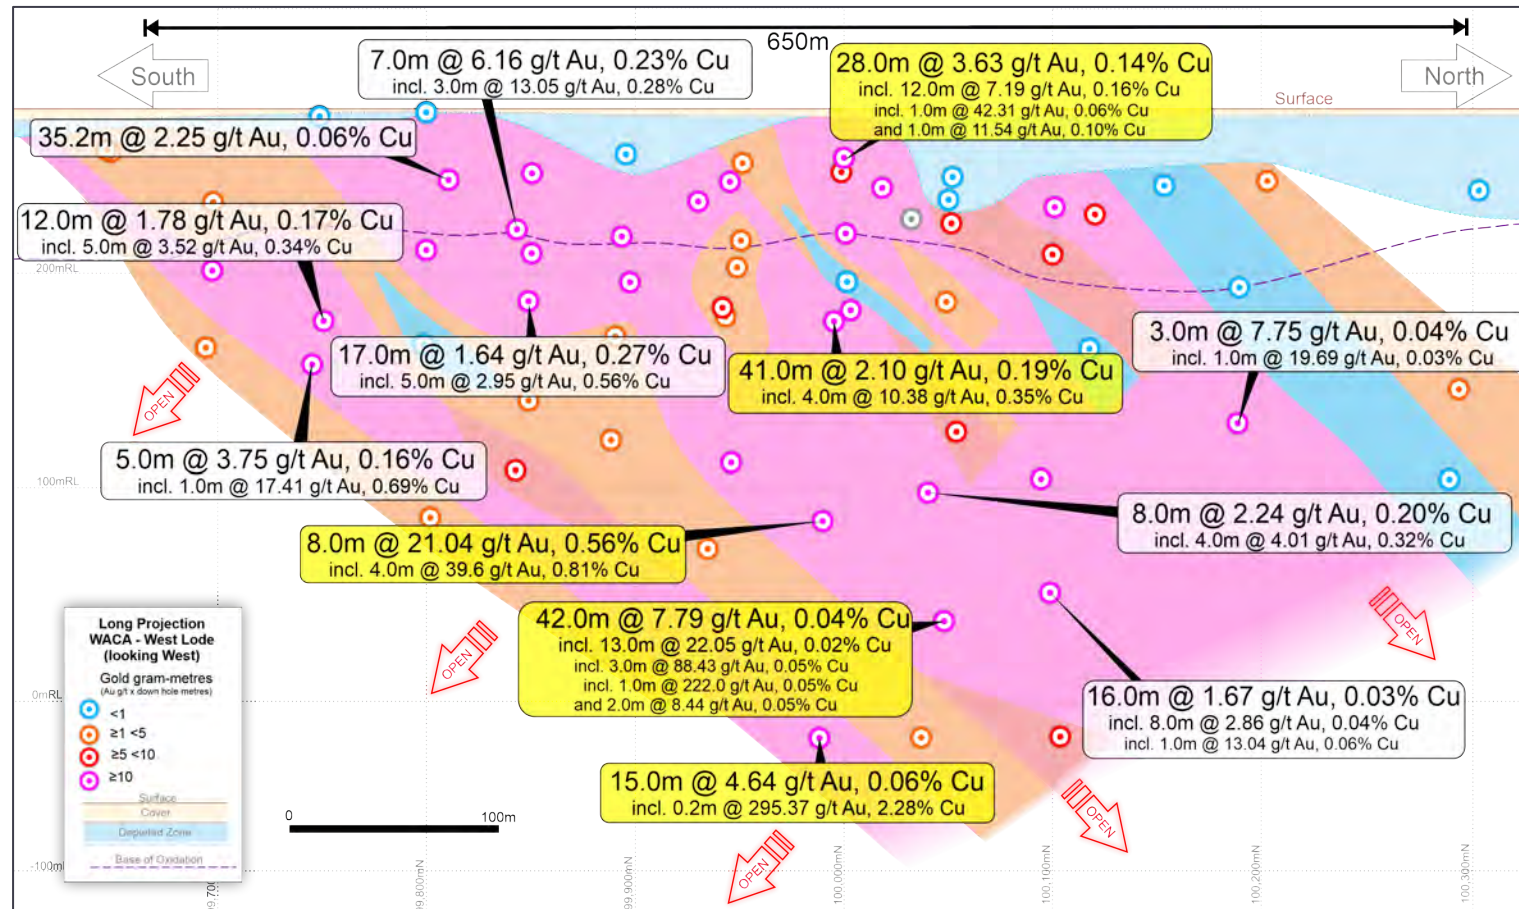

Overview

- Minyari-WACA Mineral Resource of 723koz at 2.0 g/t Au, 26kt at 0.24% Cu, 233koz at 0.7 g/t Ag¹
- Both deposits remain open down dip \pm along strike
- High-grade gold shoots remain open down plunge – Including visible gold intersections grading up to 295 g/t
- Previous drilling near Minyari-WACA resources revealed significant new mineralisation at Minyari South and Judes
- 7,000m drill programme underway – comprising diamond resource definition drilling at Minyari-WACA and air core drill testing of high-priority 2019 GAIP survey greenfield targets²

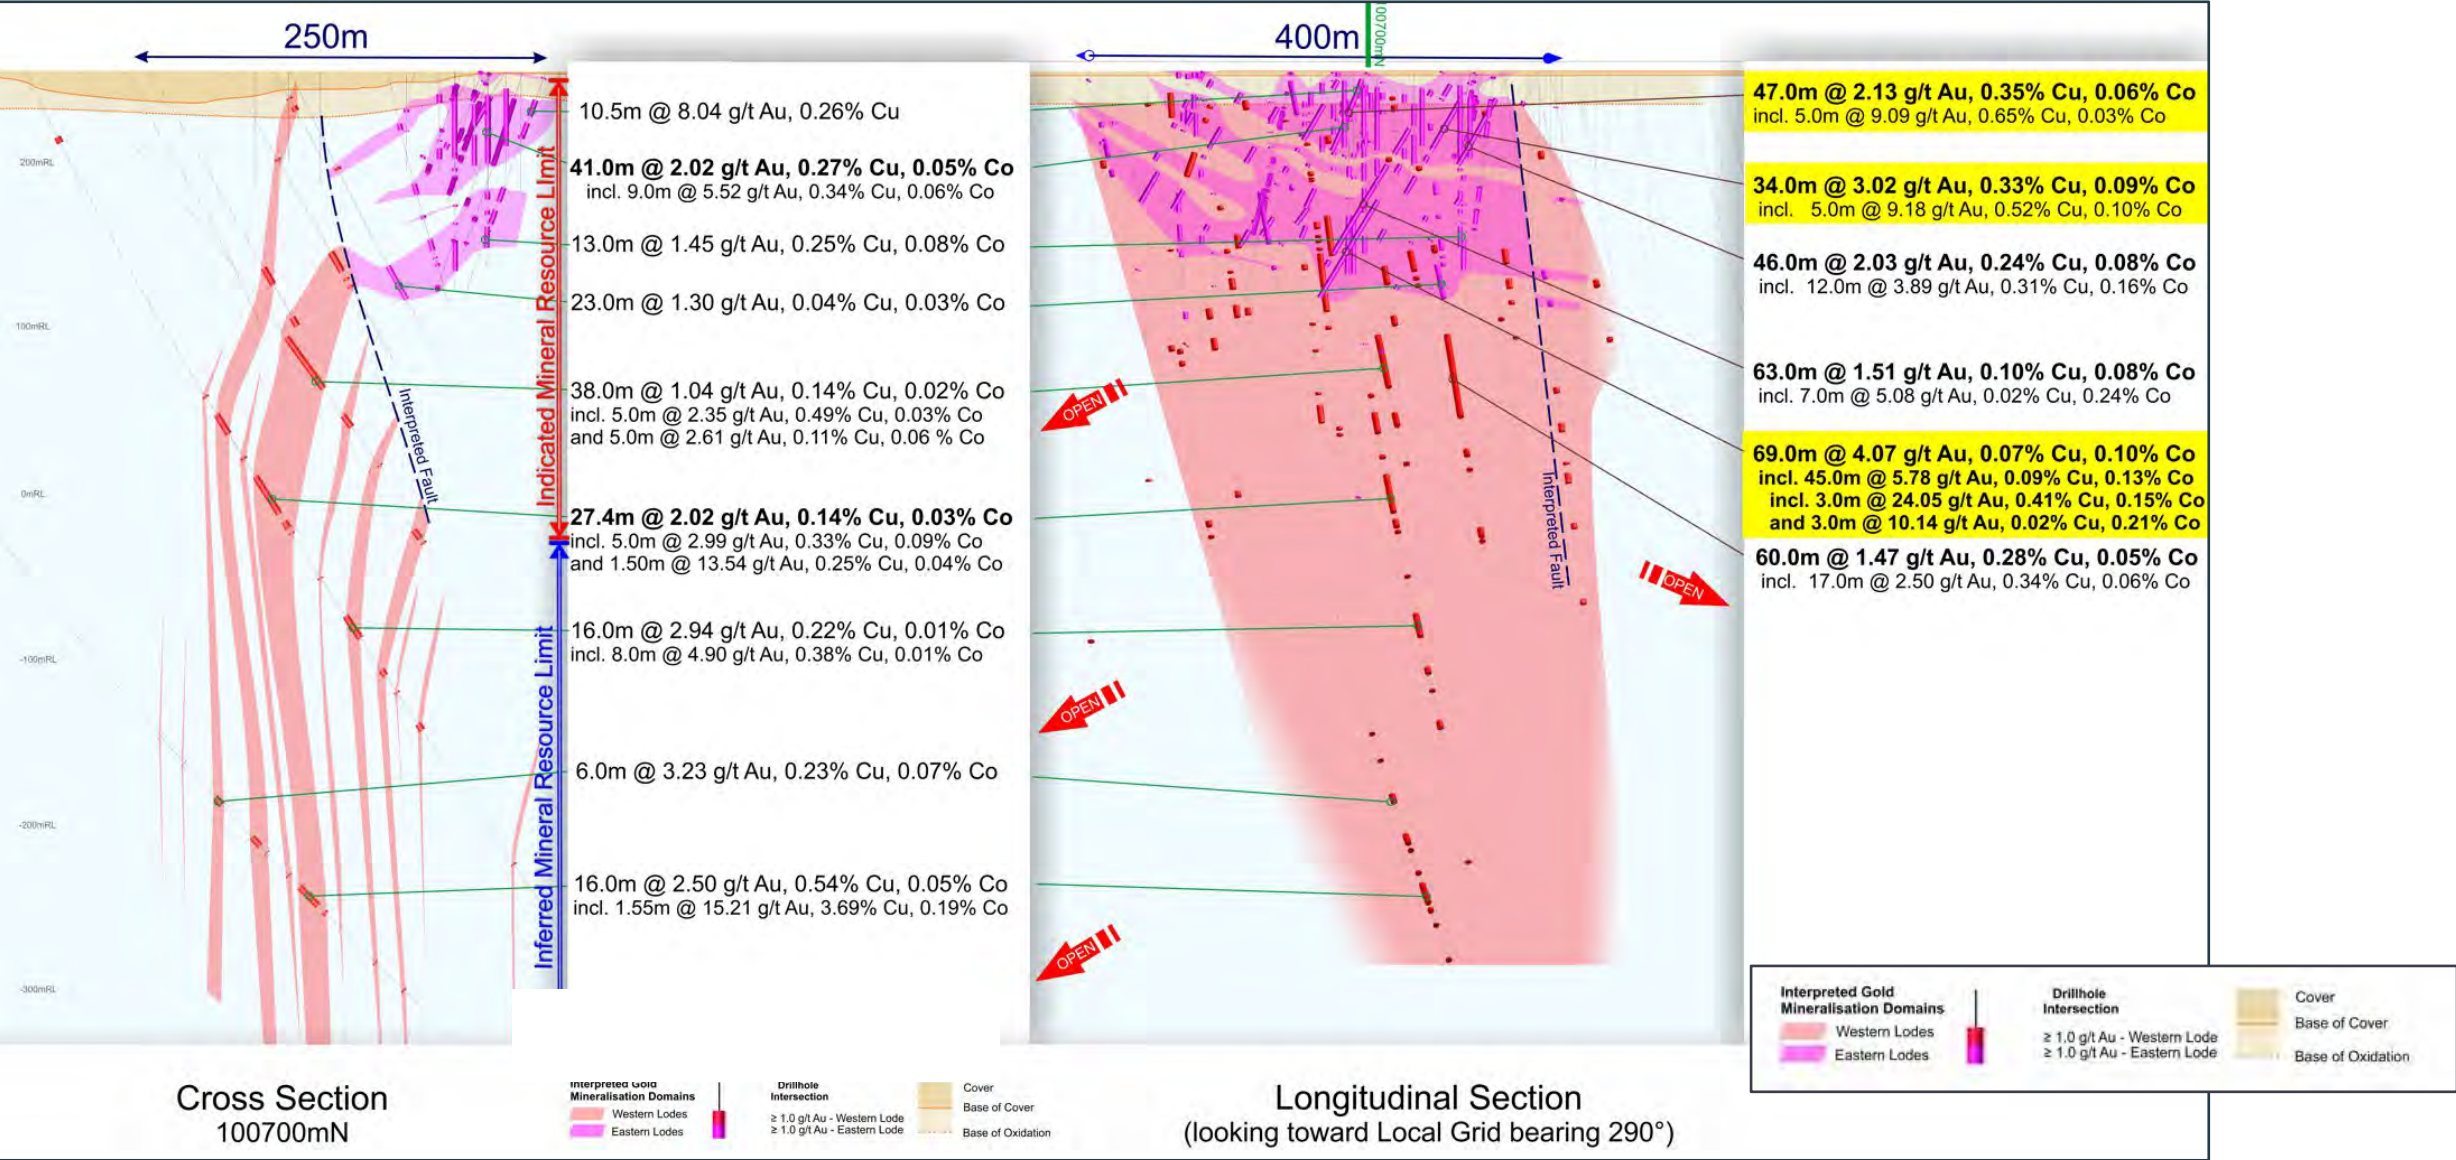

WACA Gold-Copper-Silver Deposit

1. Global Mineral Resource also contains 4kt at 380ppm Cobalt and 233koz at 0.7 g/t Silver
 2. Exploration programmes are subject to any changes which may be made consequent upon results, field conditions and ongoing review

ESTABLISHED RESOURCE BASE – 100% OWNED GROUND

Minyari Gold-Copper-Silver Deposit

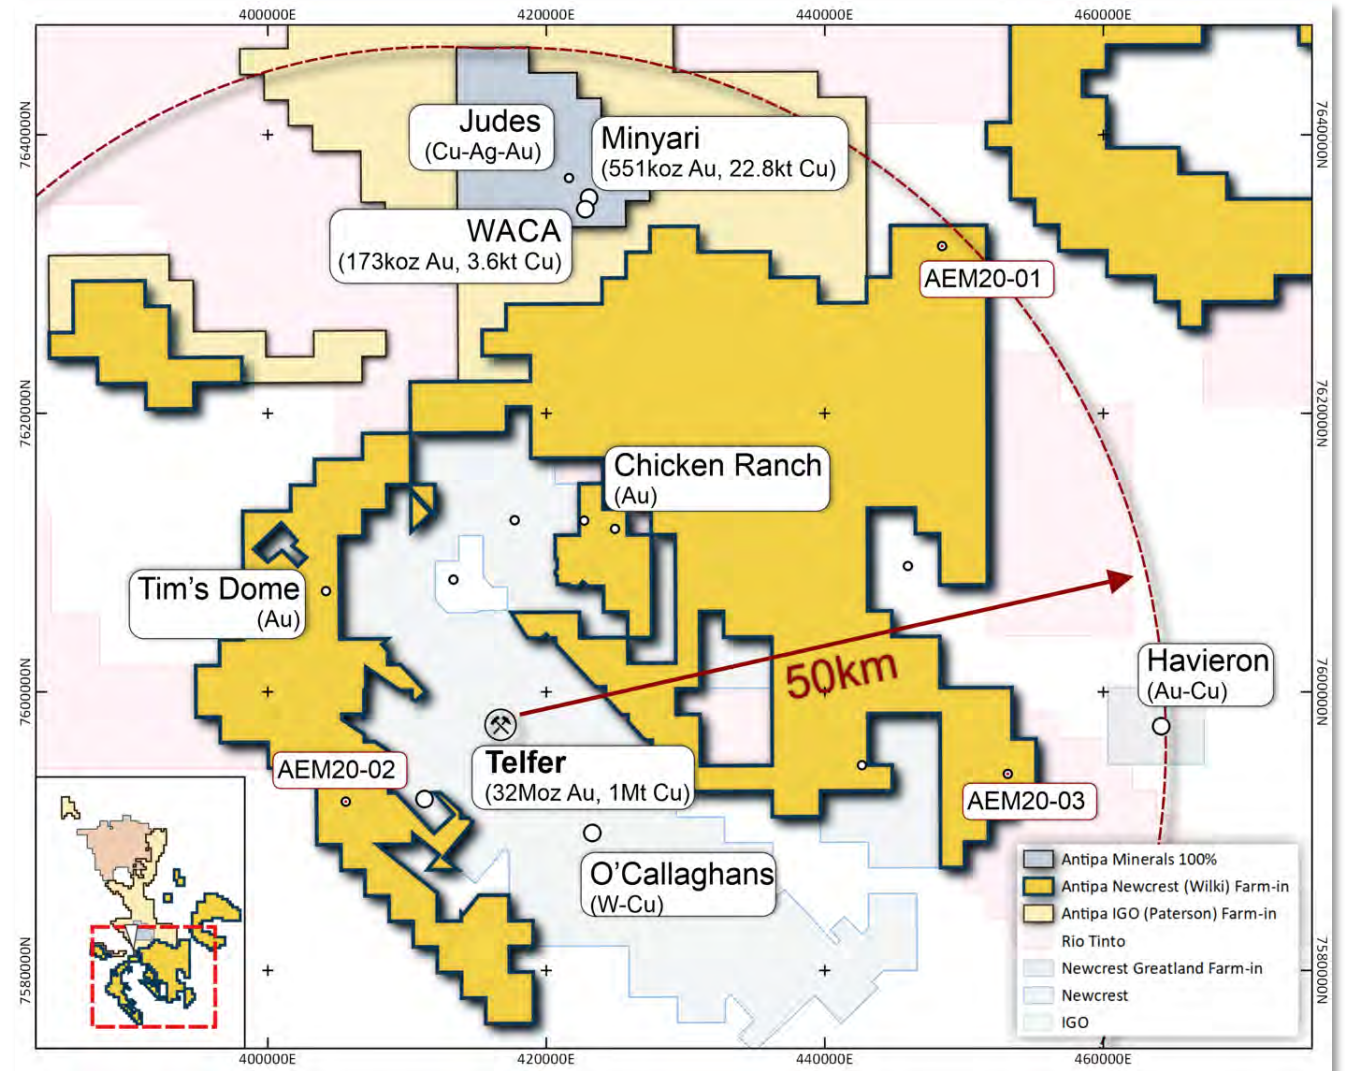

Overview

- 2,212km² Wilki Project comes to within 3km of Newcrest's Telfer gold-copper mine and 9km of the Haviron gold-copper deposit
- Initial A\$6m minimum exploration programme within two years managed by Antipa
- Newcrest may earn a 51% interest in the Wilki Project by spending a total of A\$16m¹
- Newcrest may earn up to 75% by sole funding a further A\$44m²

2020 Exploration Programme³

- Focus on Haviron and Telfer analogue targets
- Field reconnaissance - Mapping and geochemical sampling
- Aerial electromagnetics – Over areas without coverage
- Aeromagnetics - Enhanced resolution where required
- Magnetotellurics (MT) and Induced Polarisation (IP) survey
- RC ± diamond drill testing of targets under cover underway
- Identification of additional greenfield targets
- Review of Chicken Ranch and Tim's Dome resources 15km from Telfer

1. Within 5 years of 28 February 2020

2. Within 8 years of 28 February 2020

3. Exploration programme is subject to any changes which may be made consequent upon results, field conditions and ongoing review

Greatland Gold's and Newcrest's Havieron Gold-Copper Deposit

Wilki Farm-in Discovery Focus

- Havieron analogue targets
- High-grade gold + copper mineralisation
- Geophysical signature:
 - Magnetic High
 - Gravity High
 - EM Conductor
- Breccia pipe with high-grade sulphide rich outer ring zone & adjacent low-grade breccia halo
- 2020 exploration programme – AEM, gravity ± aeromagnetic and geochemical surveys – Rank anomalies and drill targets

1. Havieron deposit is the subject of a farm-in and joint venture agreement with Newcrest Mining Ltd able to earn up to a 70% joint venture interest via total expenditure of US\$65m (Refer to ASX and AIM releases 12 March 2019)

2. Refer Greatland Gold plc's website (www.greatlandgold.com) and London Stock Exchange (AIM: GGP) news releases (www.londonstockexchange.com) and Newcrest Mining Ltd (www.newcrest.com.au) and Australian Stock Exchange (ASX: NCM) news releases (www.asx.com.au)

COMPELLING GREENFIELD TARGETS (NEWCREST FARM-IN)

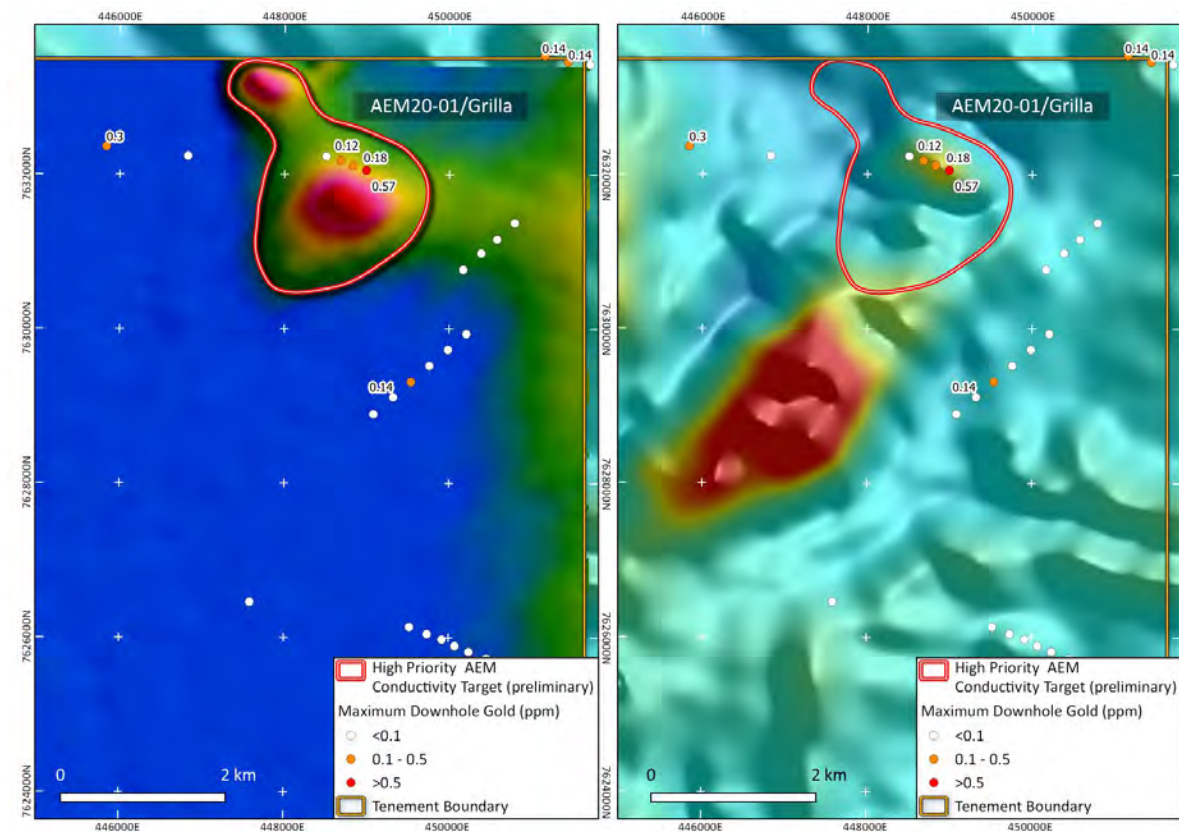

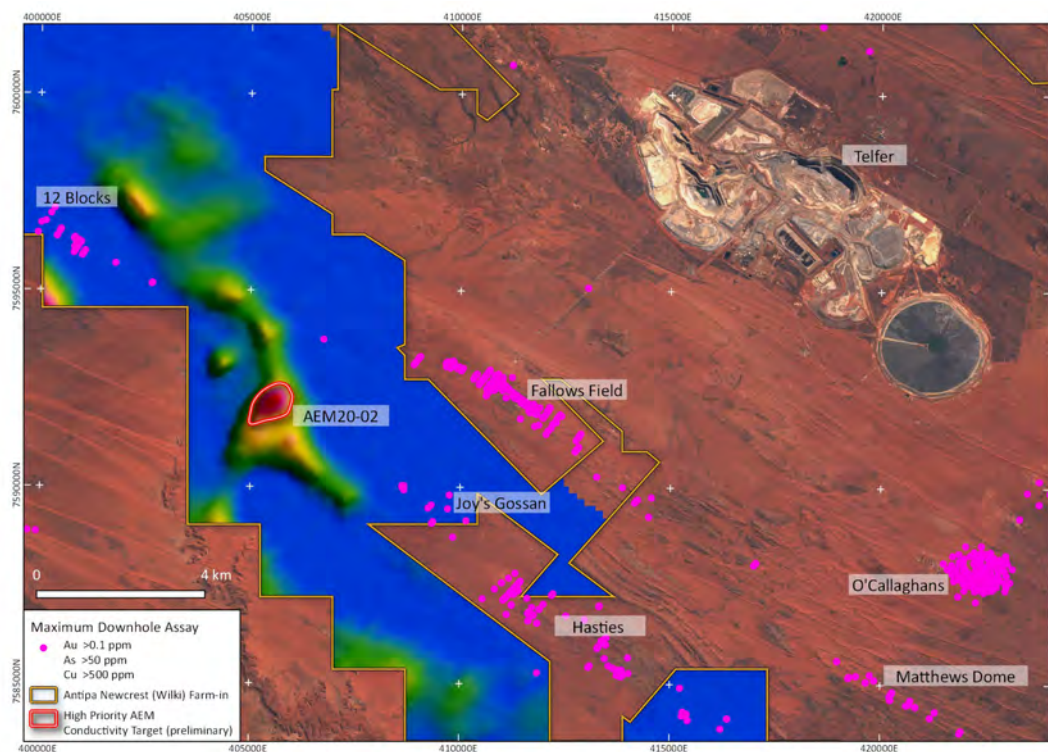

NEWCREST WILKI FARM-IN

Priority gold-copper 2020 geophysical targets

AEM Survey Defines Multiple Gold-Copper Targets

- Three high priority preliminary targets within 10 to 44km of high-grade Havieron gold-copper deposit and Telfer gold-copper mine and processing facility
- Some targets have similar characteristics to high-grade Havieron Au-Cu deposit
- AEM has resulted in several significant discoveries in the Paterson Province by identifying EM conductors representing gold and/or copper mineralisation
- Drill testing of AEM and magnetic targets commenced late October 2020¹

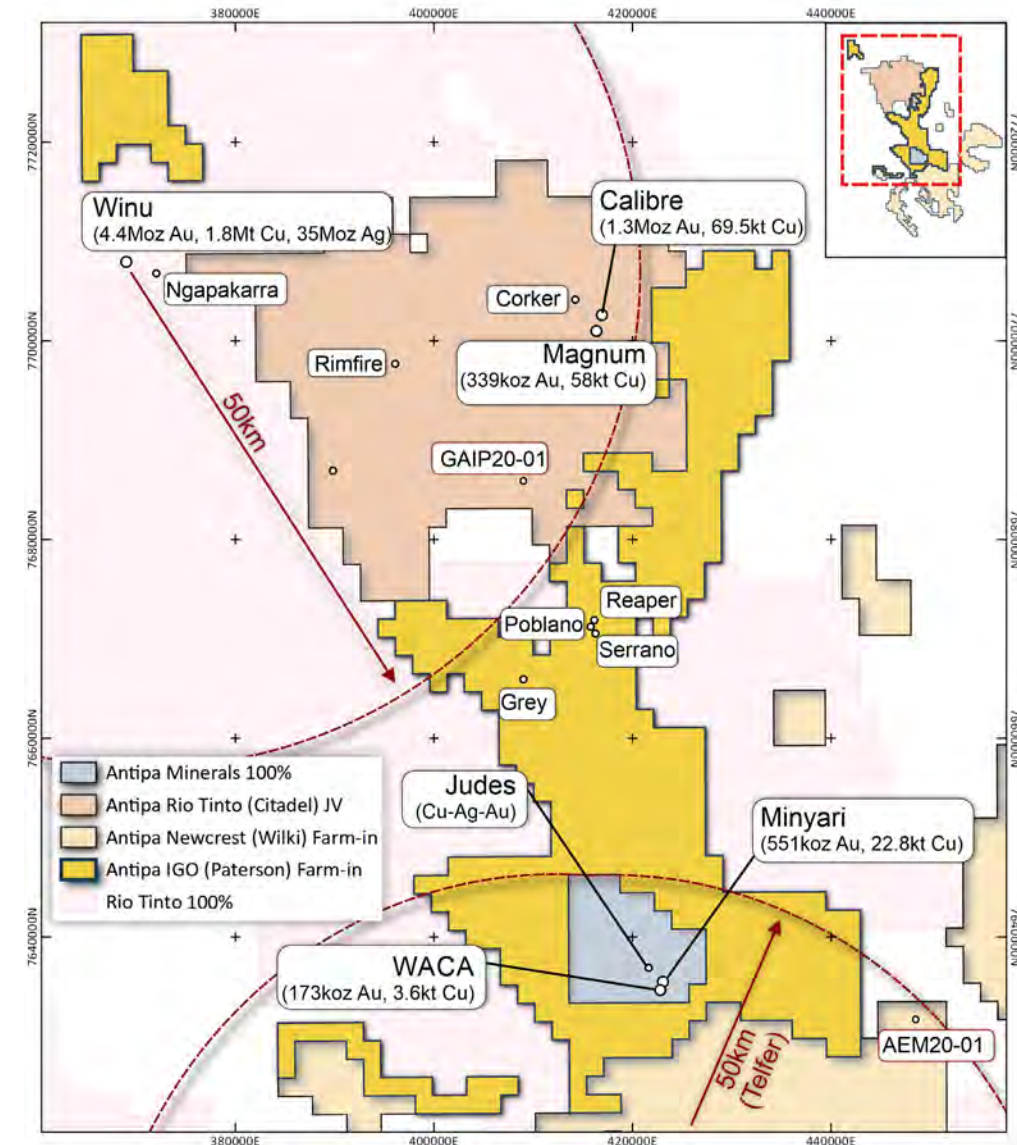

Overview

- 1,563km² Paterson Project comes to within 22km of Newcrest's Telfer gold-copper mine and 8km of Rio Tinto's Winu copper-gold-silver project
- Initial A\$4m minimum exploration programme within 2.5 years managed by Antipa
- IGO may earn a 70% interest in the Paterson Project by spending a further A\$26m within 6.5 years (to be managed at IGO's option)
- Upon joint venture formation, IGO shall free-carry Antipa to completion of a Feasibility Study

2020 Exploration Programme¹

- Focus on Havieron, Telfer and Nifty analogue targets
- Exploration activities – Drill testing of known mineral system trends, geochemical sampling, geophysical surveying, and follow-up drill testing
- Characterise stratigraphy via air core and targeted diamond drilling
- Regional geophysical surveys, including MT, gravity and further AEM, to map 3D basin architecture and key structures
- Drilling of mineralised trends commenced in October 2020¹

1. Exploration programme is subject to any changes which may be made consequent upon results, field conditions and ongoing review

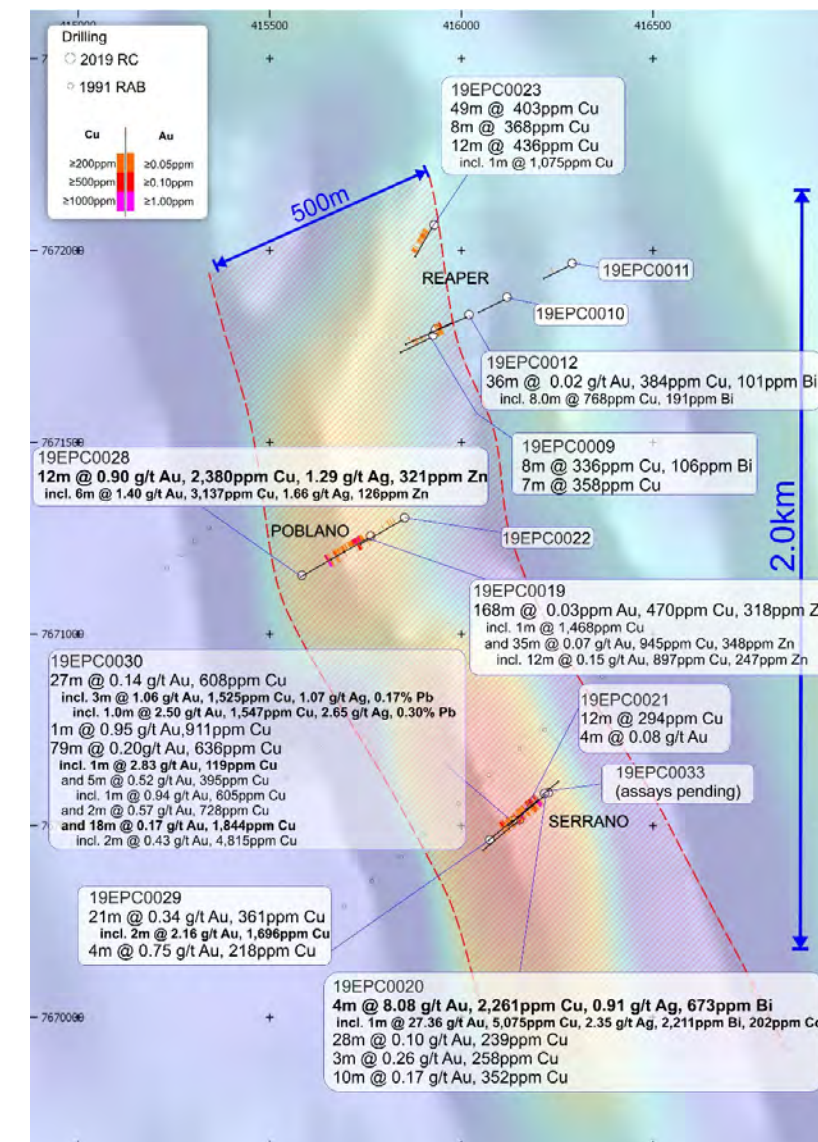

LARGE SCALE POTENTIAL (IGO FARM-IN)

Reaper-Poblano-Serrano Gold-copper Trend

Overview

- 2019 limited, very broad spaced RC drilling intersects significant gold-copper mineralisation at Reaper, Poblano and Serrano along a 1.8km trend, including:
 - 4.0m at 8.1 g/t gold, 0.23% copper and 0.91 g/t silver at Serrano (19EPC0020 from 194m down hole), including:
 - 1.0m at 27.4 g/t gold, 0.51% copper and 2.35 g/t silver
 - 79.0m at 0.20 g/t gold and 0.06% copper (19EPC0030 from 110m down hole), including:
 - 18.0m at 0.17 g/t gold and 0.18% copper
 - 35.0m at 0.10% copper and 0.07 g/t gold (19EPC0019 from 45m down hole), including:
 - 12.0m at 0.15 g/t gold and 0.09% copper
- Mineralisation open in all directions (single drill lines only at each target) under shallow cover
- Possible that Reaper-Poblano-Serrano are part of the same very large scale mineral system
- 14km from the Citadel JV high-priority GAIP target along the same mineral system bearing structure

SIGNIFICANT GREENFIELDS AND BROWNFIELDS 2020

CALENDAR YEAR EXPLORATION PROGRAMME

	Mar 2020 Quarter	Jun 2020 Quarter	Sep 2020 Quarter	Dec 2020 Quarter
100% Owned Ground: Brownfield and Greenfield Exploration – incl. Minyari / WACA High-Grade Gold ± Copper Resource Targets			Drill Testing of High-grade Gold Extensions at Minyari / WACA and Other Targets including Minyari Dome 2019 generated GAIP Targets	
Citadel Project JV (Rio Tinto Funded): Brownfield and Greenfield Exploration – incl. Calibre Gold-Copper Resource Extensions	JV Formed 1 January	Exploration Planning including Gravity Data Processing and Calibre Resource Extensional Targeting	Calibre deposit 10,500m RC and Diamond-Core (DD) Resource Extension Drilling Programme ± Calibre Mineral Resource Update. Greenfields 2,500m RC and DD Resource Drilling Programme. Major GAIP Geophysical Survey Across Structural Corridors Prospective for Gold and/or Copper Mineralisation	
Wilki Project Farm-in (Newcrest Funded): Greenfield Exploration – incl. Havieron analogue Gold-Copper Targets		Farm-in Executed 28 February	Geophysical, Surface Geochemical Sampling, Mapping and Drilling Programmes – Including Large Region of the El Paso Corridor Between Havieron and Minyari-WACA Deposits	
Paterson Project Farm-in (IGO Funded): Greenfield Exploration – incl. El Paso Corridor Gold-Copper Targets			Farm-in Executed 9 July	Geophysical, Surface Geochemical Sampling, Mapping and Drilling Programmes – Including Follow-up Drilling of Reaper-Poblano-Serrano and Grey Prospects

STRATEGIC POSITION IN THE WORLD CLASS PATERSON PROVINCE

Depth of younger cover above Antipa's Paterson Province basement

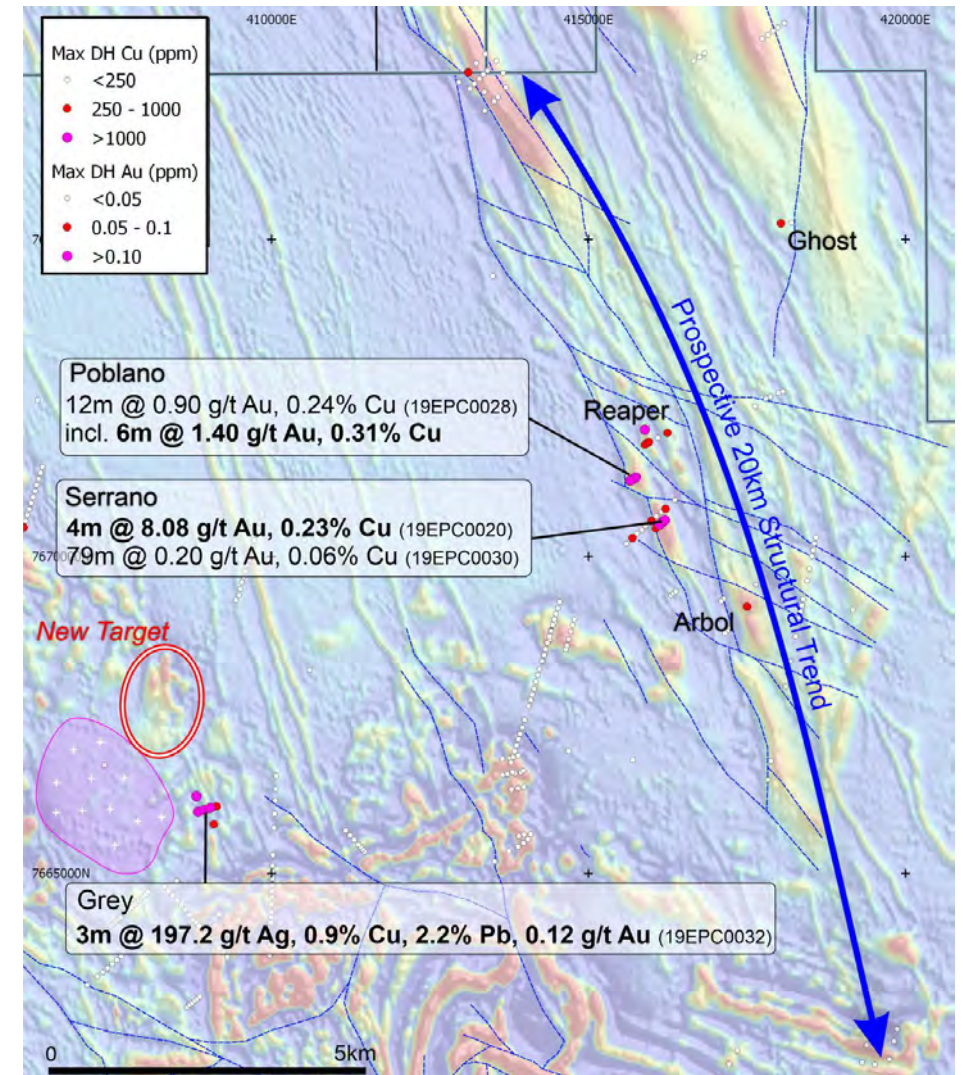

- c.50% of Antipa tenements are under less than 20m cover
- c.80% of Antipa tenements are under less than 80m cover

Greenfield exploration

Overview

- Antipa's 100% owned ground and tenements being farmed into by Newcrest and IGO host significant strike extent of highly prospective El Paso Structural Corridor
- Multiple prospects and targets:
 - Minyari-WACA gold-copper resources and several other significant deposits including Rio Tinto's Winu and Greatland Gold's Havieron gold-copper discoveries
 - Reaper-Poblano-Serrano and Grey
 - Extends 105km on 100% Antipa and farm-in ground and 45km on Rio Tinto Citadel JV
- Provides an ore forming environment similar to porphyry copper-gold belts
- Structural corridor hosts multiple mineralisation styles

Newcrest's Telfer High-grade Gold-Copper-Silver Deposit – Discovered in 1972

- Antipa's Projects include the same structural, host-rock and hydrothermal mineralisation settings as Telfer
- Telfer's June 2000 Underground Mineral Resource was 3.5 Mt at 13.8 g/t gold for 1.5 Moz gold¹
- Telfer was discovered in 1972 and has produced 14 Moz of gold from 37 of the last 41 years

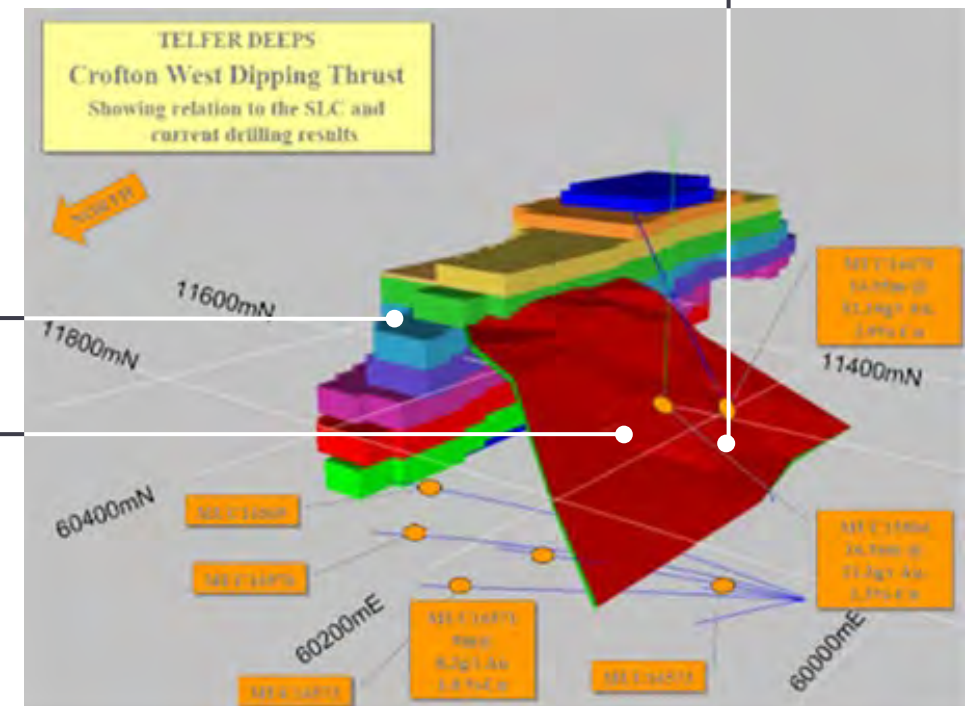

VSC dominated by low-grade high tonnage mineralisation

High-grade gold vein style mineralization - e.g. 10m at 10.0 g/t gold¹

Telfer Reef Style = Very high-grade bedding parallel mineralization - e.g. 16.1m at 52.2 g/t gold & 2.9% copper¹

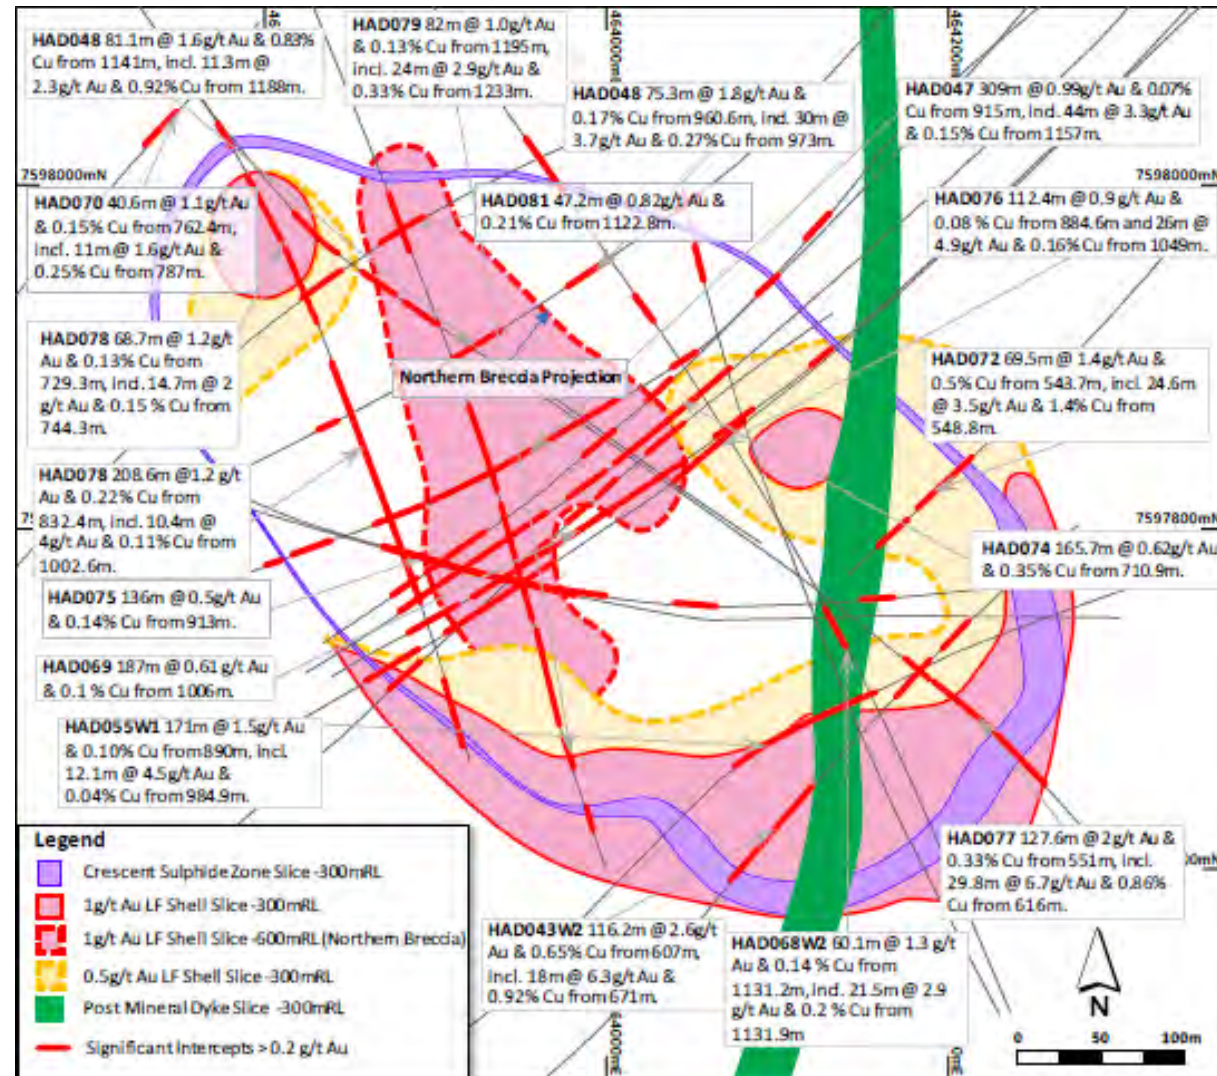

Telfer's high-grade reef style ore zones dominated Telfer's first 23 years of gold production:

- High-grade Reef Style ore zones mined from surface to in excess of 1 km below the surface
- Gold grades 2.0 to 60.0 g/t¹
- Copper grades 0.5 to 4.0%¹
- Ore thickness 4 to 15 metres¹
- Greater than 800 metres strike length¹, and
- Several hundred metres down dip¹

PATERSON PROVINCE'S WORLD CLASS POTENTIAL

Greatland Gold's Havieron Gold-Copper Deposit - Discovery Announced 2018

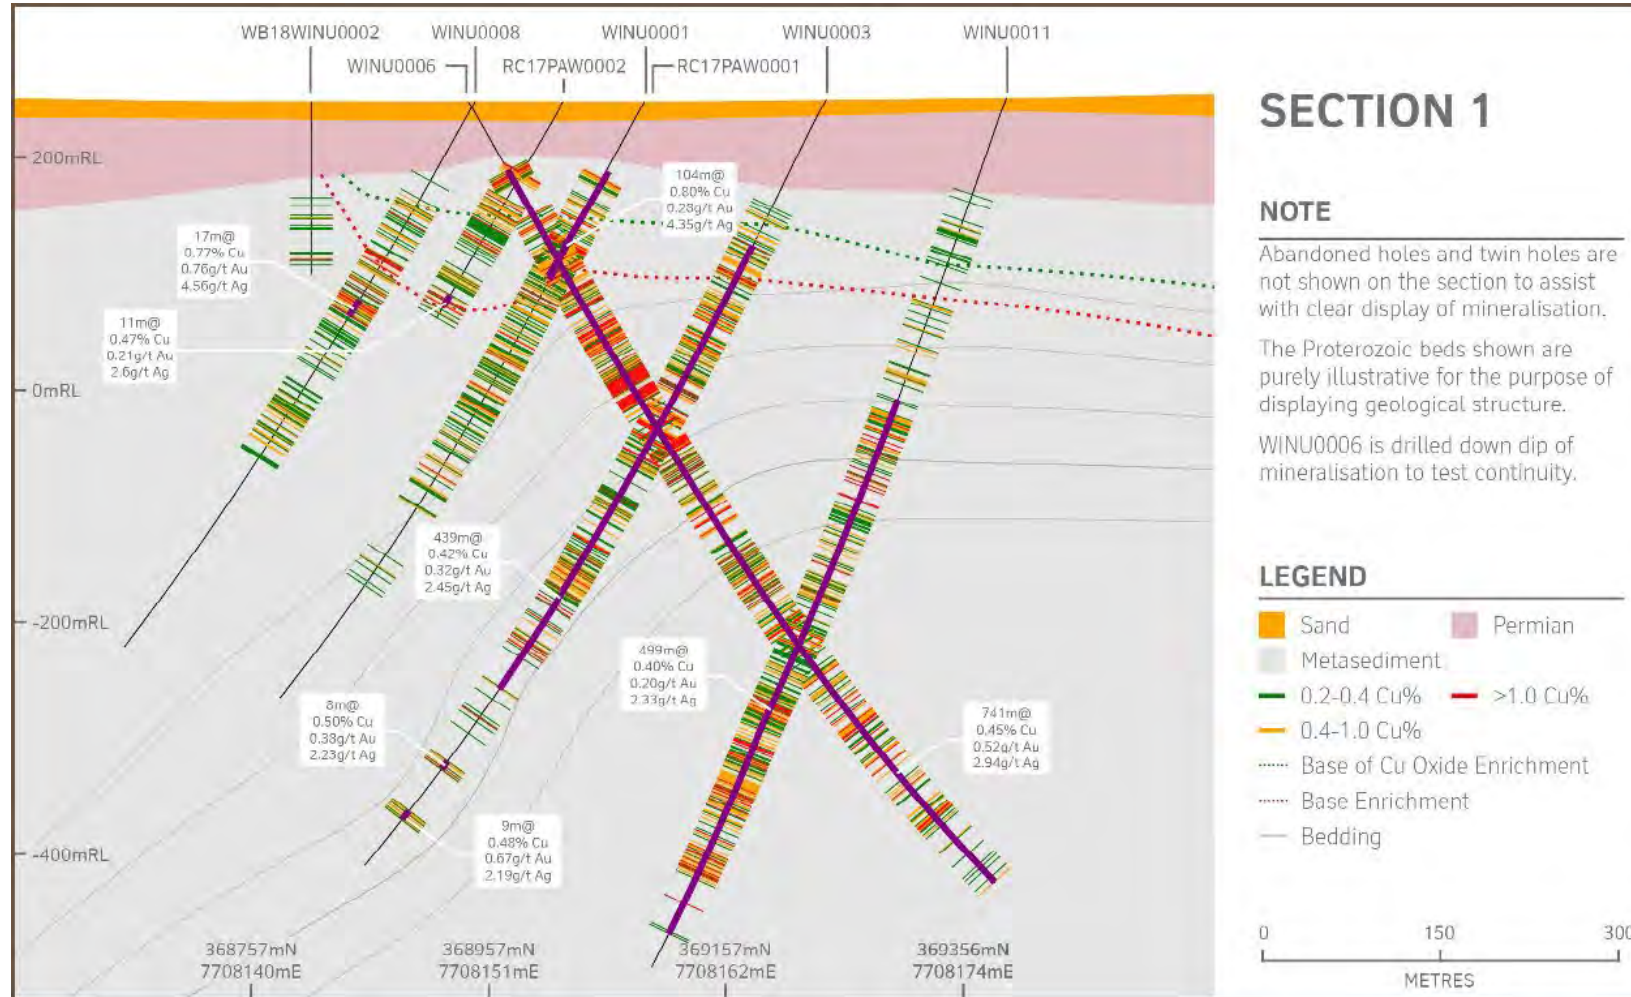

1. Havieron deposit is the subject of a farm-in and joint venture agreement with Newcrest Mining Ltd able to earn up to a 70% joint venture interest via total expenditure of US\$65m (Refer to ASX and AIM releases 12 March 2019)

2. Refer Greatland Gold plc's website (www.greatlandgold.com) and London Stock Exchange (AIM: GGP) news releases (www.londonstockexchange.com) and Newcrest Mining Ltd (www.newcrest.com.au) and Australian Stock Exchange (ASX: NCM) news releases (www.asx.com.au)

PATERSON PROVINCE'S WORLD CLASS POTENTIAL

Rio Tinto's Winu Very Large-Scale Gold-Copper-Silver Deposit - Discovery Announced 2019

Rio Tinto's Winu copper-gold-silver deposit¹ has all the hallmarks of a Tier 1 Mine in the making:

- Winu drill intersections include¹:
 - 763m at 0.44% copper, 0.65 g/t gold and 2.88 g/t silver
 - 472m at 0.43% copper, 0.35 g/t gold and 2.69 g/t silver
 - 104 m at 0.80% copper, 0.28 g/t gold and 4.35 g/t silver
 - 71m at 1.02% copper, 0.49 g/t gold and 5.14 g/t silver
 - 60m at 1.22 g/t Au and 1.03% Cu
- Winu is +1.7km long, up to 450m thick, extends for 750m down dip and remains open in all directions
- Cover only 50 to 100m and mineralisation geometry potentially favourable to open pit mining
- 5km west of the Citadel Project JV and 8km south of 100% Antipa-IGO Farm-in ground
- Similarities to Antipa's Calibre gold-copper-silver deposit located 45km away on the Citadel Project
- Located within the El Paso Structural Corridor adjacent to a major fault

2. Refer to Rio Tinto Limited's website (www.riotinto.com) and news releases on the Australian Stock Exchange (ASX: RIO) (www.asx.com.au) and London Stock Exchange (LON: RIO) (www.londonstockexchange.com)

PATERSON PROVINCE'S WORLD CLASS POTENTIAL

Rio Tinto's Winu Very Large-Scale Gold-Copper-Silver Deposit – Satellite Imagery

Rio Tinto's Winu Copper-Gold-Silver Development Project Mineral Resource¹ to a depth of only 325m below the surface including approx. 100m of cover =

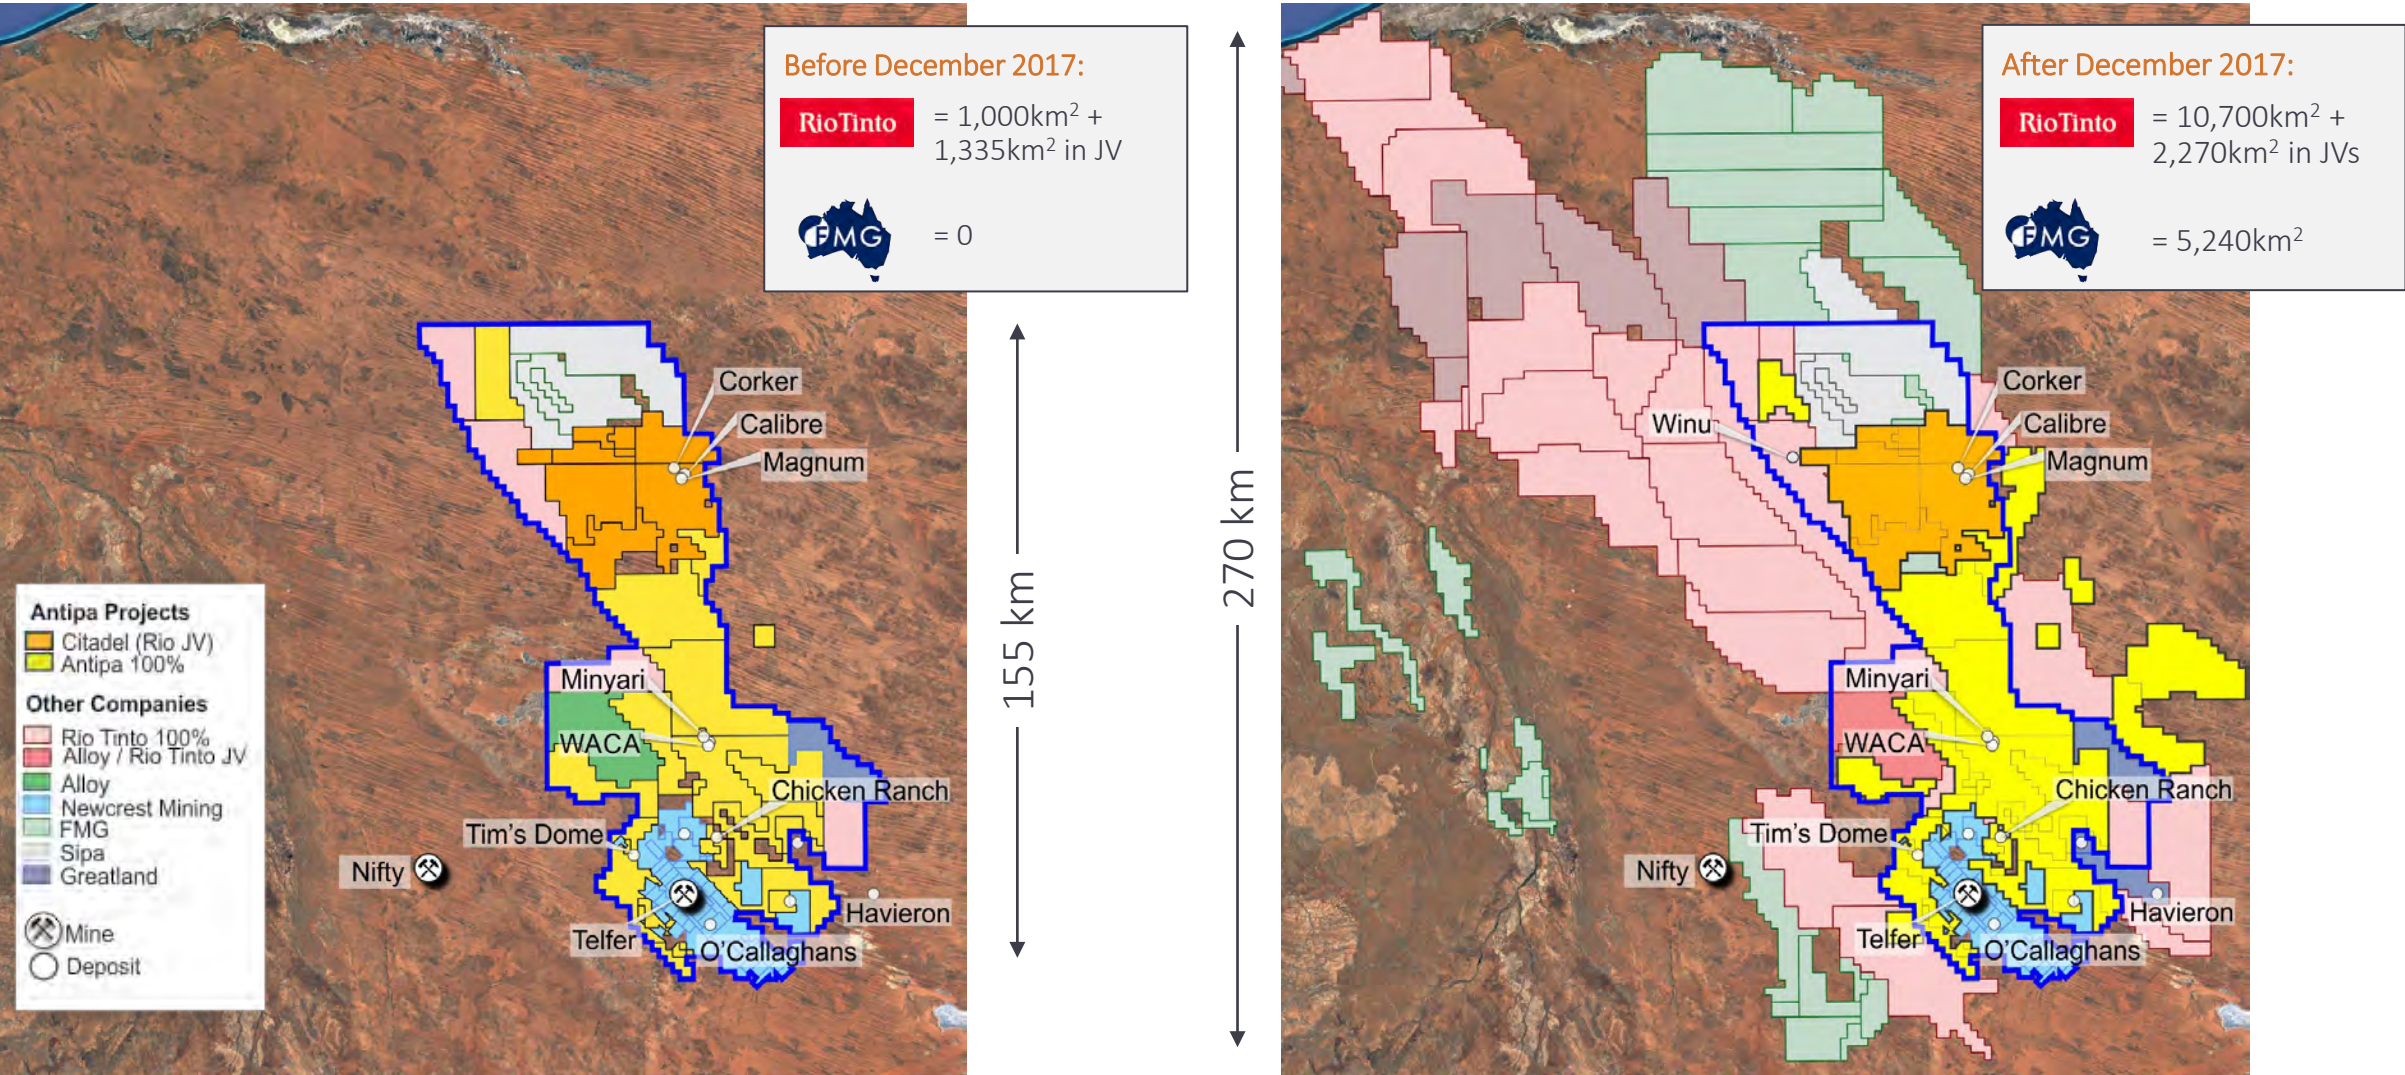

- 503Mt at 0.45% copper equivalent (CuEq) (0.2% copper equivalent cut-off) at 0.27 g/t Au, 0.35% Cu & 2.15 g/t Ag for 4.4Moz gold, 1.8Mt copper and 35Moz silver; includes a higher grade component of:
- 188Mt at 0.68% CuEq at a cut-off grade of 0.45% CuEq) at 0.36 g/t Au, 0.55% Cu & 3.21 g/t Ag for 2.2Moz gold, 1.0Mt copper and 19Moz silver

1. On 28 July 2020, Rio Tinto disclosed a maiden Inferred Mineral Resource for Winu (which at a 0.2% copper equivalent cut-off, is 503Mt at 0.45% copper equivalent (CuEq) and includes a higher grade component of 188Mt at 0.68% CuEq at a cut-off grade of 0.45% CuEq), and also released Ngapakarra prospect results. For further information on Winu, please refer to Rio Tinto's website (www.riotinto.com) and Australian Securities Exchange (ASX: RIO) news releases (www.asx.com.au)

2. Refer to Rio Tinto Limited's website (www.riotinto.com) and news releases on the Australian Stock Exchange (ASX: RIO) (www.asx.com.au) and London Stock Exchange (LON: RIO) (www.londonstockexchange.com)

PREMIUM LOCATION IN THE WORLD CLASS PATERSON PROVINCE

Exploration Results

The information in this document that relates to Exploration Results is based on and fairly represents information and supporting documentation compiled by Mr Roger Mason, a Competent Person who is a Member of The Australasian Institute of Mining and Metallurgy. Mr Mason is a full-time employee of the Company. Mr Mason is the Managing Director of Antipa Minerals Limited, is a substantial shareholder of the Company and is an option holder of the Company. Mr Mason has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity being under taking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements, all of which are available to view on www.antipaminerals.com.au and www.asx.com.au. Mr Mason, whose details are set out above, was the Competent Person in respect of the Exploration Results in these original market announcements.

Competent Persons Statement – Mineral Resource Estimations for the Minyari-WACA Deposits, Calibre Deposit, Magnum Deposit and Chicken Ranch Area Deposits and Tim's Dome Deposit

The information in this document that relates to the estimation and reporting of the Minyari-WACA deposits Mineral Resources is extracted from the report entitled "Minyari/WACA Deposits Maiden Mineral Resources" created on 16 November 2017 with Competent Persons Kahan Cervoj and Susan Havlin, the Tim's Dome and Chicken Ranch deposits Mineral Resources is extracted from the report entitled "Chicken Ranch and Tims Dome Maiden Mineral Resources" created on 13 May 2019 with Competent Person Shaun Searle, the Calibre deposit Mineral Resource information is extracted from the report entitled "Calibre Deposit Mineral Resource Update" created on 17 November 2017 with Competent Person John Graindorge and the Magnum deposit Mineral Resource information is extracted from the report entitled "Calibre and Magnum Deposit Mineral Resource JORC 2012 Updates" created on 23 February 2015 with Competent Person Patrick Adams, all of which are available to view on www.antipaminerals.com.au and www.asx.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant original market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Gold Metal Equivalent Information

Magnum Mineral Resource AuEquiv cut-off grade – Gold Equivalent (AuEquiv) details of material factors and metal equivalent formula are reported in "Citadel Project - Calibre and Magnum Deposit Mineral Resource JORC 2012 Updates" created on 23 February 2015 which is available to view on www.antipaminerals.com.au and www.asx.com.au.

Calibre Mineral Resource AuEquiv cut-off grade – Gold Equivalent (AuEquiv) details of material factors and metal equivalent formula are reported in "Calibre Deposit Mineral Resource Update" created on 17 November 2017 which is available to view on www.antipaminerals.com.au and www.asx.com.au.

Forward-Looking Statements

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Antipa Mineral Ltd's planned exploration programme and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are forward-looking statements. Although Antipa Minerals Ltd believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.
