Mining Briefs: Renaissance, Antipa and more

Monday, 4 February 2013

IN Mining Briefs today: Antipa's Calibre discovery to be a major new gold-copper deposit, and drill results for Renaissance, Korab, Ventnor and Gold Road.

Renaissance Minerals has returned significant drill results from its Okvau gold deposit in Cambodia.

Highlights include 10m at 2.1 grams per tonne gold from 38m, 3m at 4gpt gold from 21m, 2m at 4.7gpt gold from 33m, and 3m at 2.1gpt gold from 80m.

Assay results from **Antipa Minerals'** Calibre discovery have confirmed it to be a new major gold-copper deposit in the world-class Paterson province in Western Australia.

Significant results include 75.7m at 0.73gpt gold, 0.42% copper, 1.35gpt silver and 0.04% tungsten for a gold equivalent grade of 1.59gpt gold or a copper equivalent grade of 1.05%.

Korab Resources has intercepted significant gold and silver at its Bobrikovo project in Ukraine.

Significant intercepts include 45.5m at 6.15gpt gold and 27.9gpt silver from 1.5m to 47m, 55.6m at 2.25gpt gold and 17.2gpt silver from 13.5m to 69.10m, 19.3m at 5.79gpt gold and 18.7gpt silver from 2m to 21.6m, and 15.6m at 4.81gpt gold and 39.6gpt silver from 89.6m to 105.2m.

Ventnor Resources has confirmed a new high-grade shoot at its Thaduna/Green Dragon copper project in WA.

Highlights include 10m at 2.28% copper, including 3.22m at 6.60% copper from 207m, with further drilling planned for the second quarter of 2013.

Finally, **Gold Road Resources** has reinforced the continuity of high-grade gold at its Central Bore project in WA.

Significant results include 0.4m at 104gpt gold from 328.6m, including 0.2m at 185.2gpt gold.
